

AISA · AI PD STATIONS

Make something you'll use next week

A hands-on hour with the AI tools you already have

PD Day · 19–20 October 2026

Brandon Baki, Head of AI & Innovation

THE NEXT 60 MINUTES

Mostly doing, very little talking

5 min

Arrive and
settle in

5 min

Welcome and
updates

40 min

Stations

Choose your own path through the six
stations.

7 min

Share what you
made

3 min

Exit ticket

AN UPDATE

We're saying goodbye to MagicSchool

ALSA is not renewing MagicSchool. Nearly everything we did there, we can now do with tools we already have, inside our Google accounts.

BEFORE ACCESS ENDS

Tuesday 20 October

Open your MagicSchool history and save anything you want to keep: copy it into a Google Doc or download it to your Drive.

WHY THESE STATIONS?

Built from what you told us

140

staff survey responses

70

Secondary personal goals

261

Learning Hub AI module answers

~40

emails and chats asking for help

THE GAP WE FOUND

103 of 140 of you use AI often or daily.

Your top asks: **differentiation, polished decks, fast and engaging activities instead of worksheets.**

ALL USING TOOLS IN YOUR AISA ACCOUNT

Six stations

1 • CLASSROOM GEMINI

Differentiation & Scaffolding

"One text doesn't fit every reader."

2 • GEMINI & SLIDES

Polished Lesson Decks, Fast

"Slides take my whole evening."

3 • CLASSROOM GEMINI

Engagement & Participation

"I need every student thinking."

4 • GOOGLE VIDS

Turn Slides into a Video

"Absent students miss the lesson."

5 • CANVAS + ACTIVITY HUB

Code Class Activities

"I want a game, but I can't code."

6 • BUILT AT AISA

Data Anonymizer

"My data has student names in it."

7 • Learning Hub Online Module

Academic Integrity & AI

"Does the school have any AI detection software?"

TODAY'S GOAL

You won't use a tool until you've used it once.

So no demos today. You'll build real resources for lessons you're teaching soon.

BEFORE YOU START

Two ground rules

1

No student personal data

Describe your class in general terms. Names, IDs and wellbeing details never go into an AI tool.

2

You are the expert

Check every fact before students see it. In our demos Gemini unbalanced a chemical equation and invented a statistic.

HOW IT WORKS

Four steps

- 1 Open the PD arcade page
- 2 Pick the station that fixes your problem
- 3 Follow the steps, using a real lesson
- 4 **Done? Move on to another station.** The more you try, the better.

QUICK TIPS

Gemini busy? If you see “high demand” or an error, type *Please try again*.

Work in pairs if you like: one drives, one checks.

Stuck? Raise a hand and I’ll come to you.

STATION TIME

Go make something

aisa-ai-web.github.io/arcade

TIME'S UP

What did you make?

Turn to the person next to you. Show them what you made in 60 seconds, and which lesson it's for.

Pair share: 1 minute each

Made a game? See it in the Activity Hub library on screen

AFTER TODAY

What happens next

The guides stay online

Finish a station or try the ones you missed, any time.

Two-week check-in

A short follow-up: did you use it, and what happened?

Share your ideas

Loved a station? Have an idea for a new station? Help run it next time.

EXIT TICKET · 5 MINUTES

Help shape the next AI PD

Your answers decide which tools we support, what we train next, and whether anything is still missing.

Professional Meeting Log 2026-2027

Meeting Name:

Choose your own
AI adventure

AISA · AI & INNOVATION

Thank you

for giving these tools a real try. Go use what you made this week.
